**Company Profile**

ELANTAS Europe is a leading manufacturer of insulating and protective materials. We develop and produce wire enamels, impregnating resins and varnishes, casting and potting resins, electronic coatings, adhesives, products for printed electronics as well as tooling and composite materials. Our printed electronics portfolio includes conductive, insulating and functional screen printing inks for applications such as membrane switches, in-mold electronics, hybrid electronics, sensors, RFID antennas, etc.

**Business Field/Core Technology/Strength**

New developments of ELANTAS on conductive and insulating inks such as UV-curable silver inks, which allow both high printing speed and high accuracy of repeated prints, thermoformable silver inks, and inks with high thermal shock and heat stability.
