Company Profile

General Co., Ltd. was established in 1914 as a manufacturer of carbon paper. We have engaged in Printing business based on our coating and ink development technologies that were cultivated from the carbon paper manufacturing.

We aim to create value together with our customers in new fields.

Manufacturing Sites

Shiga Plant, Japan

Qingdao Plant, China

Rawang Plant, Malaysia

Sales bases

Osaka / Tokyo

U.S. / Italy

China / Malaysia

Business Field/ Core Technology / Strength

1)Coating and ink development technology

Has a large number of coating machines. Various types of coating such as single-layer coating, multi-layer coating, double-side coating, etc. are available.

Thickness of PET film : 1.5 μ m to 250 μ m

Ink Type : Solvent-based and water-based ink

2)Inkjet Ink Development

Have developed and promoted a wide range of industrial thermal inkjet ink (TIJ) including Solvent, UV-LED, and Water-based ink.

3)RFID Antenna Design/Tag Manufacturing

Can manufacture RFID Antenna within our own group.

Customizing inlay with our designer and its production are available.

4)New technology

Installed a clean corter and a high-temperature heat treatment machine (max 450 $^{\circ}$ C) in April, 2020. The machine enables coating and heat-treatment on metal foils or high-temperature-resistant films with Roll-to-Roll method.
