## Company Profile

Organic Electronics Saxony (OES) is Europe's leading cluster for organic semiconductors. OES sees itself as a technological exchange platform and unites the 33 leading Saxon and Central German companies and research institutions in this field. The strategic goal is the continuous development of know-how in organic, printed and flexible electronics in global competition.

## Business Field/Core Technology/Strength

Our range of services:

- application and coordination of regional, national and European projects
- management of conferences, workshops and symposia
- support of start-ups and placement of financial support
- representation of the regional organic and printed electronics community
- lobbying within the regional and national government and the European commission
- training and education
