## Company Profile

OPERA SOLUTIONS is based on the high-tech community developed in the field of organic photonics and electronics. We do research by contract to support industry development of state-of-the-art products, and we aim to be an innovation hub to evolve the art of soft electronics for our future life.

## Business Field/Core Technology/Strength

Our research platform is based on facilities to self-complete fabrication and evaluation of cutting-edge organic devices:

- Model making and prototyping of organic and soft electronics.
- Highest reliability in evaluation to fulfill customers' proof of concept and proof of value requirements.
- We thus accelerate customers' product development.
